

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The site's primary conversion mechanism is the coverage-check form, but it is diluted by duplicate forms and competing CTAs on the homepage and plans pages, while trust signals like reviews and guarantees are absent near pricing, undermining the confidence needed to convert. Consolidating the coverage check into a single, consistent path and placing social proof adjacent to pricing would directly increase conversion.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Missing security headers Three standard security headers are absent, weakening protection against common attacks.	Medium	Medium	6/10
2	Multiple competing primary CTAs Homepage has seven different CTAs, making the next step ambiguous and diluting conversion focus.	Medium	Medium	5/10
3	Coverage check appears twice The same coverage-check action is labeled differently across pages, potentially causing users to restart the...	Medium	Low	5/10
4	Trust badges not evidenced Claims like 'As Featured In' lack supporting logos or badges, reducing credibility.	Medium	Medium	5/10
5	Weak page metadata Meta description and Open Graph tags are missing or too short, degrading search and social previews.	Medium	Medium	5/10
6	No reviews near pricing Social proof heading exists but no review content appears near pricing, reducing trust at the decision point.	High	Low	4/10
7	Duplicate pricing pages compete Two URLs expose the same plans content, splitting traffic and confusing the funnel.	Medium	Medium	4/10
8	Multiple duplicate forms Two identical forms with CONTINUE appear on each page, creating redundant interaction and confusion.	Medium	Medium	3/10

#	Finding	Severity	Effort	PXL
9	Guarantee signal absent Heading 'SHOP WITH CONFIDENCE' lacks supporting guarantee text, weakening the trust signal.	Medium	Low	3/10
10	Images missing alt text 13 images lack alt attributes, hurting accessibility and image search traffic.	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
